## **Supplementary Figures**

Fig. S1. Stanek and Ones(21) Pan-Hierarchical Five Factor Model of personality.

Note. Construct names in italics indicate those with consistent cross-loadings on other big five factors. See <a href="http://stanek.workpsy.ch/personality-map/personality-taxonomy/">http://stanek.workpsy.ch/personality-map/personality-taxonomy/</a> and Stanek and Ones(21) Tables 13.2 and 13.3 for compound traits, their Big Five linkages, and construct definitions. Researchers are still debating if the General Factor of Personality is a substantive personality trait or a measurement artifact; see "Meaning of the general factor of personality" section in this supplement.

Fig. S2. Stanek and Ones(21) Unified Cattell-Horn-Carroll (CHC) cognitive abilities taxonomy.

Note. See http://stanek.workpsy.ch/cognitive-ability-map/cognitive-ability-taxonomy/ and Stanek and Ones(21) Table 13.1 for construct definitions. Psychomotor ability and psychomotor speed constructs not shown.
